**GLASS OF SALT IN YOUR KIDNEYS HURT**

Eat less meat if you feel Backache or have Bladder trouble—Salt is fine for Kidneys.

Meat forms uric acid, which excites and overworks the kidneys in their efforts to filter it from the system. Regular eaters of meat must flush the kidneys occasionally. You must relieve them like you relieve your bowels; removing all the acids, waste and poison, else you feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, your throat and stomach tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment; the channels often get irritated, obliging you to get up two or three times during the night.

To neutralize these irritating acids and flush out the body uric acids, get about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine and bladder disorders disappear. This famous salt is made from a pure salt of grapes and lemon juice, combined with lithia, and has been used for generations to remove uric acid from the blood and stop bladder irritation. Jad Salts is inexpensive, harmless and makes a delicious effervescent lithia-water drink which millions of men and women take now and then, thus avoiding serious kidney and bladder diseases.
